

Fairfield OESP Chapter visits the Carlin/Hydrolevel Facility for a Tech Night

The Fairfield Chapter of OESP brought their November meeting to the Carlin/Hydrolevel facility in North Haven, CT. 34 attendees started in the training room where they were welcomed by Carlin and Hydrolevel personnel before being split into two groups. One group stayed in the training classroom where John Dunleavy spoke about Carlin's B100 burner, Hydrolevel's new HydroZone relay, the CAP system and new features for the 70200 primary control. The other group was taken on a factory tour. The groups switched before OESP attendees were treated to a buffet dinner and raffle prizes.
